

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	19 October 2022
Team ID	PNT2022TMID37798
Project Name	Intelligent Vehicle Damage Assessment and CostEstimator for Insurance Companies
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via EmailConfirmation via OTP
FR-3	User Interface	User friendly and simple website
FR-4	Collect the datasets	Collect the data from the user side and their vehicle sideinformation. Collect the data from about Insurance companies plans.
FR-5	Final Results	Model should be trained with high accuracy. Results obtained from the model should be displayed toThe user with easy interpretability.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Intelligent model used to assessment the damage in thevehicle and estimate the cost to be provided by the insurance company.
NFR-2	Security	The credibility of the user and the confidentiality of userdetails about their vehicle must be maintained.
NFR-3	Reliability	This scheme can achieve good accuracy in damage estimation and cost estimation, thus providing accurateand unbiased insurance coverage to the user.
NFR-4	Performance	Real-time images are to be captured and uploaded to thewebsite, where the proposed model performs damage assessment and gives the insurance cost accordingly.
NFR-5	Availability	The website should be compatible with web browsers onboth mobile phones and computers.
